

Introducing our new program:

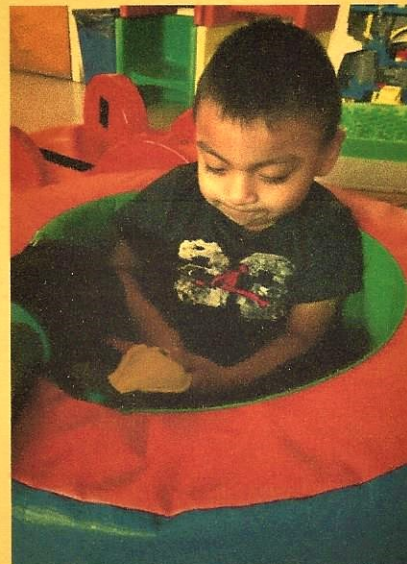

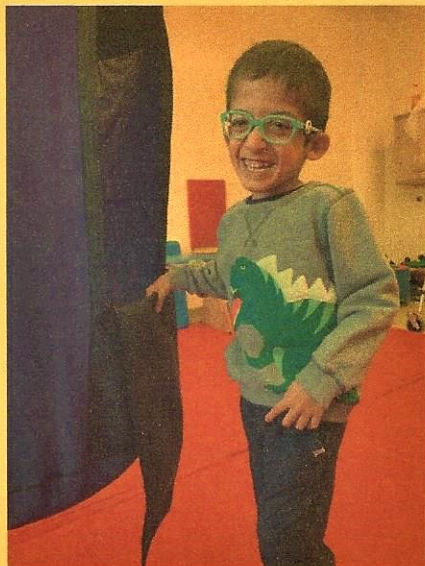

LEAP AHEAD THERAPEUTIC PLAYGROUP

1st Cerebral Palsy of New Jersey is proud to offer a **FREE** center-based playgroup to our community. In order to be eligible, toddlers must be enrolled in the New Jersey Early Intervention System, be between the ages of 18-36 months, attend with a parent or caregiver, and meet our criteria for participation.

The purpose of this playgroup is to provide the toddlers and their families with support in the areas of social, emotional, cognitive and physical development. In addition, the playgroup is run by a speech-language pathologist and will focus on enhancing speech and language, play and feeding/oral motor skills with the children and their families. Attendees will also have the opportunity to trial various adaptive equipment and assistive technology while participating in fun sensory experiences.

The first group is starting in April 2019 and will meet weekly for 60 minutes for an eight week period.

For more information and to apply, email: LeapAhead@cerebralpalsycenter.org

The mission of the 1st Cerebral Palsy of New Jersey School is to assist all students with special needs to lead more active and productive lives. Offering individualized education plans and a comprehensive therapeutic approach, our nurturing staff aims to provide students with unique learning experiences that will enable them to reach their highest potential.
